Methylene Blue
Analysis

CUSTOMER NAME: Mico Corp
ADDRESS: 800 Claremont Ave. Bensalem, PA 19020

Your sample film strips have been tested for archival quality (residual thiosulfate concentration). They were tested according to the methylene blue method described by the American National Standards Institute.

Concentrations of less than (1) 1.4 mg (micrograms) indicate archival quality, and greater than (2) 1.4 mg indicate non-archival quality. The test is only meaningful and accurate if performed no later than two weeks after processing. It is our understanding that we have received your film within the 2 week time-frame.

Actual test readings are provided below, as well as "pass/fail" check marks.

TEST IDENT.	ACTUAL CONCENTRATION	MEETS ANSI STANDARD ($\leq$) 1.4 mg	DOES NOT MEET ANSI STANDARD ($>$) 1.4 mg
MARKAGE Bureau 14/14-15, 16, 17	.11	✓	

Archival quality photographic preservation of residual thiosulfate.

Residual thiosulfate concentration, as defined in ANSI standard (Z39.18-1993) "A", is so low under archival storage conditions it is suitable for the "long term" value. This same standard sets the archival limit at 1.4 mg for

MICROFILM CORP.

Methylene Blue
Analysis

CUSTOMER NAME: Micor Corp
ADDRESS: 800 Clarendon Ave. Bayside, N.Y. 11004

Your sample film strips have been tested for archival quality (residual thiosulfate concentration). They were tested according to the methylene blue method described by the American National Standards Institute.

Concentrations of less than (<) 1.4 mg (micrograms) indicate archival quality, and greater than (>) 1.4 mg indicate non-archival quality. The test is only meaningful and accurate if performed no later than two weeks after processing. It is our understanding that we have received your film within the 2 week time-frame.

Actual test readings are provided below, as well as "pass/fail" check marks.

TEST IDENT.	ACTUAL CONCENTRATION	MEETS ANSI STANDARD (< 1.4 mg)	DOES NOT MEET ANSI STANDARD (> 1.4 mg)
Micor Corp Bayside 8/14-15, 16, 17	.11	✓	

Archival quality photographic film, as defined in ANSI standard Z39.48-1968, is suitable for the preservation of records having permanent value. This same Standard sets the archival limit at 1.4 mg for residual thiosulfate.
